

Art can take us back in time to reflect on all our past, or it can push us into the future. Art can bring people together regardless of background.

Art can tell a community's shared story. It generates social capital and strengthens a community's character.

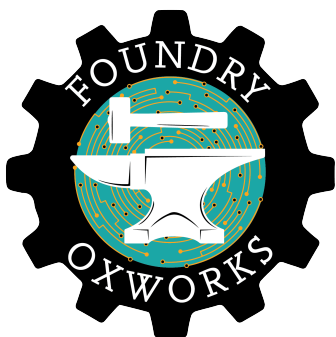

The Foundry has the power to inspire people to pursue their passions, to explore areas of curiosity, and to have real experiences in the tangible world.

Tapping into our creative selves reduces stress and anxiety and increases positive emotions.

The Foundry is intended to capture the essence of our community's skills, knowledge, resources, and gifts. It shows what we already know how to do, guides us in our desire to learn, and provides a platform for incubating new ideas.

Industry will benefit from a community who values making things. Individuals benefit from using their own creativity in ways that give them pleasure, even leading to greater opportunities in a satisfying career field.
